The Looking Glass Difference

Looking Glass Development can provide you with a true partnership built for success. Our real-world experience in program and project management uniquely positions us to understand your needs. We are an organization committed to using the same tools we install for our customers. Our vast experience in the information technology field combined with our project and program management skills allow us to install, configure and customize Microsoft's latest enterprise program management (EPM) tool to effectively meet your needs today and in the future. Our staff offers industry leading skills in project management, .NET, SQL and the many other tools needed to successfully customize the Project Server environment.

What Is The Microsoft EPM Solution?

Microsoft Project Server 2003 is a web enabled tool based upon Microsoft's industry leading platforms SharePoint Services, SQL Server and .NET. These technologies allow any member of an organization to see the right information at the right time to make key decision and then share that information quickly with others in the organization.

Organizational Views

With Microsoft Project 2003 it's fast and easy to get an organizational view of your portfolio using your web browser or Outlook. Now senior managers can monitor and customize key metrics to meet organizational needs from tools they constantly use.

Manage Resources

Microsoft Project Server allows you to manage your resources based upon utilization and skills. Like all information used in Project Server 2003, resource information is stored in a SQL Server 2000 database making it robust enough to handle even the largest resource pools. Microsoft's industry leading charting and graphing capability makes it fast and easy to turn information into knowledge. The What-If tool allows users to analyze the impact of resource and schedule changes across the entire portfolio of projects.

"Looking Glass Development was the only vendor we looked at capable of helping us develop our own project management methodology, implement Project Server and then teach us how to use it all."

System Requirements

Microsoft Office Project Professional 2003 runs on most Pentium PCs with a 233 MHz or higher processor, 128 MB of RAM minimum, and Microsoft Windows 2000 with Service Pack 3 or later, or Microsoft Windows XP or later.

Microsoft Office Project Server 2003 runs on a server with a Pentium 550 MHz or higher processor, 256 MB of RAM minimum, Microsoft Windows 2000 Server with Service Pack 3 or later, Microsoft Internet Information Services (IIS) 5.0 or later, and Microsoft SQL Server 2000 with SP3 or later. Windows SharePoint Services requires Windows Server 2003 or later. Other system requirements are highly dependent on the configuration of the server.

Microsoft Office Project Web Access runs on PCs with a Pentium 133 MHz or higher processor, Microsoft Windows 98 Second Edition or later, and Microsoft Internet Explorer 5.01 with Service Pack 3 or later.

Improve Communication and Tracking

Project Server 2003 allows you to define roles which control what information can be seen by every user. The tool also allows you the flexibility to create team websites for each project and store documents, issues and risks for rapid, online retrieval. And, only Microsoft Project Server 2003 offers full integration with Microsoft Outlook for easy time and performance reporting.

Reasons to Use Looking Glass Development

- ▲ LGd provides nationally recognized project management expertise on every project.
- ▲ LGd can provide a completely outsourced hosted solution.
- ▲ LGd offers a 100% guarantee on its installations

What people are saying about Looking Glass Development

"Instructor is truly outstanding. Very experienced in technical subject matter and real world experience. Excellent enthusiastic teacher. Entertaining as well as informative. The most useful and worthwhile three days of training I've ever had."

"The instructor has demystified the basics of project management for our class. He has helped us realize that there are processes and tools to help us be successful in our next project."

"Looking Glass Development provided the MS Project Server expertise we need to be successful. Without them we never would have succeeded."

"The LGd team proved you can still get quality service in IT with our installation of MS Project Server."

"Looking Glass Development was the only firm we talked to who understood our methodology and were able to customize Project Server to it."

What people are saying about Project Server 2003

"Good news for enterprises: Microsoft Project 2003 Server is no longer restricted to the desktop and can now serve enterprise-level users by giving them access to multiple projects and resources." CRN Nov. 7, 2003

"Demands are greater on everyone in the project chain... Microsoft Office Project Server 2003 addresses the 'more-projects, less-time' mindset by providing capabilities that enable all members of the project to do their jobs faster and better." Projects@Work Nov. 7, 2003

"Project 2003 offers several new features designed to boost use of the products in the enterprise. Project Server 2003 will link with Outlook 2000 or higher and Excel 2000 or higher... allowing users to access and change information about their projects using tools they might already work with." Infoworld Aug. 14, 2003
